Stephen Harper is a reefer-maniac bent on overflowing Canadian prisons with nonviolent drug offenders!

On February 27, 2009, Prime Minister Stephen Harper introduced legislation (Bill C-15) that, for the first time in Canadian history, would impose mandatory prison sentences for cannabis offences.

Harper *claims* the new legislation is meant to target "organized crime" and "serious drug offenders," but the bill includes a mandatory prison sentence for growing as few as ONE cannabis plant!

In 2002 the Department of Justice Canada studied the effectiveness of mandatory minimum sentences and concluded, "Drug consumption and drug-related crime seem to be unaffected, in any measurable way, by severe mandatory minimum sentences."

"Tough on Drugs"
Soft on Logic

Stephen Harper refuses to listen to science on the issue of drug policy!

Make plans to attend this year's **Hwy 420 Anti-Prohibition Rally** and help us raise public awareness about Bill C-15 and about the reality that prohibition is destroying Canadian society by enriching criminal organizations.
